Continued Non-compliance

- x Some or all of the research protocol must be suspended or terminated.
- x The data rust be destroyed and may not be used when reporting the research results.
- x The PI is suspended or disqualified from conducting human subject research.

Monitoring Research Protocols

All protocols reviewed by the HSare subject to regulatory monitoring by the HSarsonnel. Studies can be selected at random for review to ensure compliance with hubiteats regulations or HSCequirements or determinations.

After a protocol has been selected for monitoring and **lystwab** to four days before the planned visit, the HSCChair or designee contacts the investigator, and study coordinator if applicable, to schedule the monitoring appointment. A written follow message from the HSCOnfirms the
